

2layer
laminated process

dualboard

Elite are an exclusive user of the superior quality melamine board called 'Dual Board'. The board consists of a chipboard core surfaced on both sides by a sheet of MDF. The newly developed 'Dual Board' material offers significant advantages including structural, machining and component strength.

The material offers Elite's client increased quality and added value. It offers greater impact resistance combining the durability of MDF and Chipboard into a single board. Dual Board enables Elite to rout, drill and cut cleanly without any break-out or chipping. The MDF faces of 'Dual Board' eliminates any irregularities or pitting associated with raw chipboard and translates this into perfect laminating for a smooth even surface. For our highly complex production operation this level of board performance is essential and translates directly into the high standards of quality offered to Elite clients.
