Ace

MULTI-PURPOSE SEATING

Designed by Claudio Bellini, Ace is driven by the idea to rethink the one-shell chair archetype. Outlines of the plastic shell gracefully flow from the seat to the back and create a loop which gently embraces the back cushion. This elegant touch creates unique visual dialogue between the cushion and the plastic frame and evokes perception of levitation and lightness. The open lumbar area and flexible back allow a user to sit in the most comfortable posture. Inner structure of the back cushion follows the body's natural movement and maximized flexibility.

Please refer to the price and specification guide for all available options.
