# Breeze

# Breeze

Breeze has been designed in response to the demands of the modern workplace, where flexibility and agility are essential elements of furniture design. The back frame's smooth contours provide a comfortable and supportive posture with generous proportions. Breeze features a central balance point that adjusts through the users natural movement. A highly engineered, breathable mesh is an integral component offering an enhanced vertical and lateral lumbar support moulding to each users body shape.

Please refer to the price and specification guide for all available options.
