STOOLS

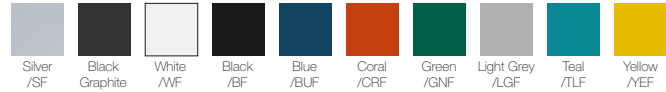

The Escape stool offers a high level of comfort and support, without compromising on style or functionality. It is built around a sturdy steel frame with an integral footrest. The seat is constructed of plywood, covered with a soft, cushioned fire-retardant foam before being upholstered in a choice of fabrics. The Escape stool range is available in silver, black, black graphite, white or a range of colourful epoxy coated frame colours, as well as the standard chrome finish. A stylish, comfortable and extremely practical solution for many workplace and leisure environments.
