Our Plastic Awareness Policy

We adhere to our Circular Economy business model that aims to deliver 100% recyclability.

The use of recycled plastic in place of virgin resin typically results in reduced energy consumption, lower cost, and reduced environmental impact.

Our Hygiene Protection Screen products permits all plastic components to be recycled through curbside programs. The following illustrates what type of plastic is used and its recyclable properties.

WHAT WE USE	RESIN TYPE	RESIN ID CODE
Hygiene Protection Screen Construction:		
MFC Panel Edging.	Acrylonitrile Butadiene Styrene.	(ABS) 9
Castors	Polyamide (Nylon - Type 66, 30-33% Glass Fibre)	(PA)
Screen Infill Strip	Polypropylene.	(PP) 5
Screen Cap	Acrylonitrile Butadiene Styrene.	(ABS) 9
Acrylic Screen	Perspex® Polymethyl Methacrylate.	(PMMA)7
Packaging Materials:		
Packaging Cling Film.	Low Density Polythene.	(LDPE) 4

Polyamide (PA)

Polyamide is 100% mechanically and feedstock recyclable. Recycled content is made into new product formulations. This is a mixed plastic made up of many polymers.

Low Density Polythene (LDPE)

LDPE is not often recycled through curbside programs, but some communities will accept it.

Polypropylene (PP)

Can be recycled through some curbside programs.

Acrylonitrile–Butadiene–Styrene (ABS)

ABS is recycled by first shredding used plastics to produce shredded plastics. After this step, metals and undesirable plastics are separated from the shredded plastics to produce separated plastics.

Polymethyl Methacrylate (PMMA)

PMMA, the key type of acrylic, can be recycled in several ways. This normally involves subjecting the resin to pyrolysis. It is possible to recover the monomer from PMMA scrap by depolymerization. PMMA has been successfully depolymerized by contacting with molten lead resulting in MMA with a purity more than 98%.
