

ODYSSEY SYSTEMS

TELECOMMUNICATIONS

In order to modernise their working environment and create an impact for visiting clients, Odyssey engaged with Elite to furnish their refurbished offices.

After initial meetings, it was decided that the Progress range of bench desking was the best solution due to its contemporary feel and features, including the gas lift height-adjustment. These benches were teamed with Mix task chairs, offering premium ergonomic functionality. The finishes applied to the office space consisted of white desktops and leg frames, blue acrylic screen panels and white Mix chairs complemented with white leather seat pads and blue mesh.

To further enhance the space, Odyssey selected Retreat booth seating and leather Cascara high back chairs with deep buttoning for the breakout areas, finished in blue and white leather.

Overall, the furniture paired well with the technology Odyssey were installing, creating a functional and aesthetically pleasing environment that represented their brand to the highest standards.
