

VEGA CONTROLS

MANUFACTURER

Mocha Furniture partnered with Elite for German manufacturer, VEGA Controls' new UK headquarters in East Sussex. VEGA manufacture level and pressure sensor solutions for liquids, solids and gases across a number of industries.

Set in a rural area, the purpose-built office was designed to take advantage of its surroundings and bring the outside in, resulting in a stunning modern space.

Bespoke 2000mm wide electric height adjustable Progress Plus desks and Vida task chairs were selected for staff workstations whilst storage including desk-side towers, modular lockers, Cubeform units provided ample storage space. Vice Versa chairs, Bill chairs and stools and Lux tables at both dining and poseur height were used throughout to create a variety of breakout and touchdown workspaces.

Mocha commissioned Martin Bloomfield at **Seaside Creative** to capture the remarkable transformation of this office.
